## XCISION® FORCEPS

The Miltex® Xcision® brand of forceps are the original forceps featuring a unique, light weight, ergonomic handle. The circular openings help to reduce hand and wrist fatigue and make the instrument easier to clean. The Xcision® forceps have a wear resistant Teflon disc which helps reduce wear in the joint of the instruments. They also feature a slim, compact design for easy access to molars.

The Miltex® Xcision® extracting forceps have been designed to allow subgingival access to the root while removing a tooth. The beaks are anatomically shaped and tapered, which allows them to penetrate deeper into the tooth socket and maximize the tooth-to-forcep contact. Serrated beaks allow for better gripping of the tooth surface, which helps aid in the atraumatic extraction of the tooth and reduces the risk of fracturing the root structure or causing trauma to the surrounding hard and soft tissues.

Features	Benefits
